Dr. Casey McClone is a primary care physician specializing in sports medicine and is board certified in both family medicine and sports medicine at Orthopaedic Associates of St. Augustine.

Dr. McClone is able to serve the needs of those seeking relief from all types of musculoskeletal pain, as well as work with athletes to help improve their performance and maintain their health.

“I am able to care for a wide range of ailments. I treat athletes with associated athletic heart diseases and lung issues,” said Dr. McClone. “In addition, I treat most types of non-operative orthopedics such as tendonitis and bursitis. I also work with people suffering from arthritis.”

Dr. McClone is well versed in treating patients of all ages, male and female, with various aches, pains and health concerns.

“I am a family doctor at heart, so I did a lot of training with kids and I enjoy taking care of them, as well as our senior population and all ages in between,” explained Dr. McClone.

“I treat not just athletes but anybody in need of my area of expertise. In medicine, we want to do what is most conservative right away. I would start those conservative measures and if those conservative measures did not work out, then we would go on to other treatment options.”

Dr. McClone has a close relationship with the surgeons at Orthopaedic Associates of St. Augustine and through direct and timely consultation with each other, a patient can expect quicker and more accurate results.

His specialty is ultrasound-guided injections. This type of procedure is extremely helpful in diagnostics as well as in actual treatment of injuries and pain.

“If you feel like something hurts and it’s in a complex region of the body, we can put the injection right there and bathe it in a local anesthetic. We can then retest you and if your pain goes away, we know that is the problem.

“It also allows me to pinpoint the accuracy of the delivery of treatment. It is not necessary with every injection we do, but for some of the more complex or deeper tissue injections, it allows me to differentiate the tissue and see that we are going to get it in the exact right spot.

“I am able to treat a wide array of patients of any age and most musculoskeletal issues. From fingers to knees to hips, I am happy to help with it all.”

Dr. McClone is a native of Waupaca, WI and is an avid Green Bay Packer football fan admitting to “bleeding green and gold.” He completed his undergraduate studies at University of Wisconsin, Stevens Point prior to graduating from medical school at Ross University, Dominica, West Indies.

Dr. McClone served his residency at the Mayo Clinic in Rochester, MN and was fellowship trained at Mayo Clinic in Jacksonville.

Orthopaedic Associates of St. Augustine has two locations. Their main facility, including an After Hours Injury Clinic and Outpatient Surgery Center, is located at One Orthopaedic Place in St. Augustine. A second facility, Sports Medicine and Physical Therapy Center, is located at 3055 CR-210 West, Suite 110 in St. Johns. Dr. McClone will be available at both locations.
